## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The claimed combination specifically including; a generally U-shaped hard disk base having first and second sidewalls and a top wall, two receiving plates projecting perpendicularly out from the top wall comprising sliding grooves, and a mounting element comprising a blocking object, a handling portion, and a second sliding mechanism, is not rendered obvious by the prior art

The art of Liang et al. (Patent # 6,351,376) teaches the use of the two sidewalls, a top wall, and two plates projecting perpendicularly out from the top wall, but fails to teach the sliding grooves as part of the plates, or the mounting element mounting to an outer surface of the first sidewall. Additionally, the art of Liao et al. (Patent # 6,377,449) teaches the use of the two sidewalls, a top wall, and a mounting element, but fails to teach the two plates projecting perpendicularly out from the top wall, or the handling portion of the mounting element. Note also references to Wang et al (Patent # 6,721,177), and Hartung et al. (Patent # 6,795,309).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
